

SERVICE NOTICE IN REGARDS TO COVID-19

We are committed to ensuring the safety of our customers, employees and community. We are closely following the updates from the CDC, and we have implemented the recommended strategies to help slow the spread of the virus.

If you have a project that requires templating and installation, we have the following guidelines to schedule services :

1. Has anyone at the jobsite exhibited a fever, cough or shortness of breath recently? The on-site services will need rescheduled at least 2-3 weeks after those symptoms appeared.
2. Interactions on-site must maintain a minimum social distancing space of six feet. We recommend customers leave the work area unless any questions need answered.
3. All surfaces in the work area must be cleared and free of any personal items before our crew arrives.
4. If at anytime our employees feel unsafe due to the conditions on-site, then we may request the services to be rescheduled until the issue has been resolved.
5. Our crews visit a variety of jobsites each day, which puts our employees at high risk of exposure. If the customer is aware of this and willing to accept that risk, then we can proceed with scheduling services.

Masks and gloves are available to be worn upon request.

Please contact us to discuss any questions or concerns about your projects at (317) 822-9858 or via email at CountertopConnectionsInc@gmail.com

Stay safe and healthy!
